Amy-

The required deliverables are identified in the Settlement Agreement, and does not include a capping evaluation. If EMJ wants to do perform a capping evaluation outside of the Settlement Agreement, it is certainly open to doing so. And EMJ can provide it to EPA as a voluntary submittal, which EPA may or may not provide comments on.

Hopefully that clarifies things.

Becky

You might be able to answer it here. I want to confirm that EMJ can indeed propose to EPA that a capping evaluation be performed but that it just needs to be submitted in stand-alone, separate deliverable.

Thx,
Amy

Can you expand on removal of the cap evaluation? Need to see if that requires counsel.

Hi Becky,

Three items:

- Comment No. 14 - Section 2.2.1 Locations. Discussion on discrete sampling locations.
- Comment No. 36 - Section 4.1.1 Z-Layer Characterization. First Bullet. What criteria will be used to determine whether it is necessary to analyze the archived sample from 2-3 feet?
- Removal of capping evaluation.

Thanks,
Amy

Can you please give me more detail what the specifics are. I need to know who to bring from my team.

Thanks

Becky

Hi Becky,

A couple of comments I would like to discuss with you. Please let me know your availability over the next couple of days. A call should work fine.

Thanks,
Amy

Subject: EPA's Required Revisions to EMJ's CQAP Modification and OMMP Addendum for Surface and Subsurface Sediment Sampling within the Jorgensen Forge Early Action Area

Enclosed are EPA's required revisions to EMJ's CQAP Modification, which details the subsurface sediment sampling plan; and OMMP Addendum No. 2, which details the surface sediment sampling plan.

Becky
